The ILTP Library in Intuitionistic Linear Logic

October 10, 2018

Abstract

Here we present the results of the for the ILLTP-* and KLE-* benchamrks in https://github.com/carlosolarte/Linear-Logic-Prover-in-Maude.

1 General Information

- Test run on a QEMU Virtual CPU, 2GHz, 64 bits, 2GB of RAM running Ubuntu.
- Timeout: 2min.
- Maude version: 2.7.1 built: Oct 2 2017.

• The search procedure considers proofs using up to 10 times the copy rule (focusing on one of the formulas of the classical context). Since this procedure is not complete, failures cannot be considered as non-provable sequents. For this reason, we reprocessed the problems that returned "failed" with a prover where the copy rule can be used an unboundedly number of times. The sequents marked as fail here can be then considered as non-theorems (since the prover explored all the possibilities).
